PROFILE

Dedicated Mechanical Engineer with **Bachelor's Degree** and experience in precision manufacturing and CNC operations. Proven Experience in 3D CAD modelling and technical problem-solving using industry standard software such as SolidWorks and AutoCAD. Solid foundation in mechanical mechanisms and recent local experience, seeking to leverage technical proficiency in Project Engineering or Mechanical Design role within a forward-thinking engineering firm.

DEMONSTRATED SKILLS AND ACHIEVEMENTS

Mechanical Design

- Experience in all aspects of 2D and 3D CAD modelling including Sheet Metals, Weldments and advanced assembly.
- Understanding of the above functions in commercial environment, including knowledge of quality management methods.
- Familiar with Design for manufacturability (DFM), quality assurance protocols, and safe work compliance (Current Victorian High-risk Work Qualification - Forklift).
- Deployed a comprehensive digital engineering portfolio hosted on GitHub showcasing CAD models and technical documentations - <https://antony731.github.io>

Project Engineering

- Served as Project Engineer at Petrocil Engineers & Consultants, coordinating multidisciplinary design and detailed engineering within the oil and gas sector.
- Conducted technical compliance reviews for mechanical and piping systems to ensure strict adherence to international standards, including ISO 9001:2015.
- Directed technical vendor evaluations and managed procurement cycles, ensuring all supplier components seamlessly aligned with detailed engineering requirements.
- Oversaw Critical engineering documentation and project deliverables, bridging communication between design teams and external stake holders to consistently meet project milestones.

Computer

- **SolidWorks** (advanced), **AutoCAD** (advanced)
- **MS Excel** (advanced), **Word** (intermediate), **Wrench EDMS** (intermediate)

Communication

- As a Project Engineer at Petrocil, I continually liaised with external vendors and stakeholders successfully resolving complex procurement and design requirements to ensure compliance with ISO 900:2015 standards.
- Coordinated internally with multidisciplinary engineering colleagues to validate complex 2D drawings and 3D models, ensuring seamless cross disciplinary communications and on-time delivery of critical project documentation.

PROFESSIONAL EXPERIENCE

Dec 2025- Present, Mechanical Designer (temporary)

Imperio Tech, Derrimut, VIC

A precision manufacturing firm providing CNC machining, welding, and CAD/CAM services. Focused on delivering high-quality, custom engineering solutions for diverse industrial sectors.

Key Responsibilities

- Designed and optimized manufacturing processes, bridging the gap between initial CAD models and final production
- Evaluated component quality using precision metrology tools (micrometres, callipers) to verify alignment with engineering specifications.
- Implemented Safety protocols to ensure secure work environments.

Apr 2025 - Nov 2025, Engineer

Naveena Zeal Technologies, India

ISO 9001:2015 certified industrial firm specializing in the design, manufacture, and distribution of high-precision packaging, sealing, and vacuum machinery to retail and wholesale markets.

Key Responsibilities

- Utilized SolidWorks and AutoCAD to develop complex 3D models, detailed 2D technical drawings, and full mechanical assemblies, ensuring precise alignment between design intent and manufacturing output.
- Facilitated cross-functional collaboration between R&D and vendors to resolve manufacturing bottlenecks and ensure on-time delivery of critical machine parts.
- Led continuous improvement initiatives across the production cycle, actively redesigning legacy components to streamline assembly time and reduce material waste.

Achievements:

- Developed and prototyped a rotary cup sealing system, creating detailed technical drawings and Bills of Materials (BOM) to streamline the manufacturing process.

2023 - 2024, Project Engineer

Petrocil Engineers & Consultants Pvt Ltd, India

An ISO 9001:2015 certified international engineering consultancy specializing in multidisciplinary design, FEED, and detailed engineering services for the oil, gas, and infrastructure sectors.

Key Responsibilities

- Coordinated multi-disciplinary teams (Process, Civil, Electrical, Mechanical, Piping, Instrumentation) ensuring adherence to project milestones.
- Supported planning, monitoring, and execution of engineering deliverables across projects.
- Prepared and reviewed project documents, proposals, reports, and schedules.
- Conducted design reviews, HAZOP, SIL studies, and 3D model reviews.

Jul 2021 - May 2023, Phone Banking Officer Federal Operations and Services, India

Jun 2018 – May 2019, Customer Service Associate, Sutherland Global Services

EDUCATION AND QUALIFICATIONS

2014-2018

Bachelor of Technology (Mechanical Engineering – 4 years degree)

Albertian Institute of Science and Technology (Affiliated to Mahatma Gandhi University, India)

PROFESSIONAL DEVELOPMENT/ CERTIFICATIONS

2025 – Ongoing - Cert III Access Professional Development (partial single subjects' micro credential)
Victoria, Melbourne Polytechnic, Preston

2026 - Six Sigma Green Belt Certification

Advanced Innovation Group Pro Excellence (CPD Accredited)

PERSONAL DATA

Languages: English, Malayalam

Current LF Forklift licence

Interests: music, bushwalking and travel

REFEREES

Referees available upon request
